Consciousness-Raising Quantum-Leap-Causing-Paradigm Shifting Minimum Estimate of overdue under and unpaid value of work of Love and Life - family community and life-enhancing productivity. of women and non-dominator, peace-loving men/per person, earned in value of gender balanced decision-making of health, happiness and sustainable win-win wealth instead of false win-lose, haves and have nots, war, and lack of Harmony with Nature. Price per year since 1913. A huge share of the nation's and world's economic "growth" over the past 30 years has gone to the top one-hundredth of one percent, who now make an average of \$27 million per household. The average income for the bottom 90 percent of us? \$31,244 in currently accepted dollars, with great undercredit to the 99%, a symptom of gender imbalanced decision-making and lack of Risen Sisterhood and Brotherhood. Unit Price is estimated at \$11,111 symbolizing EI Even (Even and Fair according to the ilntended Plan for the Children of All Ages of MotherFatherGod) per Year per person, or \$22,222 per couple. NOTES: <http://motherjones.com/politics/2011/02/income-inequality-in-america-chart-graph>

False wealth and poverty and warmaking have been with us as long as everyday women and men have been excluded from fair representation in government and business decision-making. The matter has gotten worse again recently. A huge share of the nation's economic growth over the past 30 years has gone to the top one-hundredth of one percent, who now make an average of \$27 million per household. The average income for the bottom 90 percent of us? \$31,244. But that is in GDP "dollars". This invoice is for both cumulatively reparative regular dollars and gender balance based GPI (Genuine Progress Dollars) <http://soulsolar.webs.com/aboutgendertender.html>

with gender balanced decision-making that would eliminate war and waste, put human science and government in Harmony with Providential Nature, and make everyone whollistically unboundedly healthy, happy and wealth. Also added is estimated amount for under and unpaid work, most done by women, and undistributed Judeo-Christian Jubilees

The US should be at gender 5050 but instead ranks 78/92 with ties <http://www.ipu.org/wmn-e/classif.htm>

The US Government is controlled by mostly male corporate CEOs whose salaries have become obscene, now about 550 times the average worker, having grown since this website shows how that dwarfs other countries, many of which have CEO caps.

<http://creativeconflictwisdom.wordpress.com/2011/10/07/ration-of-ceo-pay-to-average-worker-by-country/>

But even this does not reflect the injustice done to women, whose unpaid and underpaid work is not being properly credited in the outmoded GDP. As a result, women are increasingly becoming poor.

<http://www.tavistalks.com/womenandchildren/>

More than half of the 46.2 million Americans living in poverty are women, and 29 percent of adult women are more likely to be poor than adult men. From 2009 to 2010, more than 1 million additional children also fell into poverty, and the numbers continue to rise. Women make up 51% of the world's population but 70% of the world's poor. But in instead of helping these people, US resources go pointlessly to the military.

http://en.wikipedia.org/wiki/Military_budget_of_the_United_States#Comparison_with_other_countries

The 2009 U.S. military budget accounts for approximately 40% of global arms spending. The 2012 budget is 6-7 times larger than the budget of China, and is more than the next twenty largest military spenders combined. This only encourages other countries, like Iran, North Korea, and others to military overexpenditure and nuclear weapons proliferation.

The equal presence of women also bring far better stewarding of the environment

<http://gas.sagepub.com/content/19/4/506.abstract?ck=nck>, <http://legalplanet.wordpress.com/2012/04/09/will-estrogen-save-the-planet/>

If we had as many women in office as Sweden has had since the 1980's, we would have abundant wind and solar instead of global warming from oil and coal corporations, likely earthquakes and tsunamis from frakking, and no threats from nuclear like that of Japan, which also give rise to nuclear weapons proliferation in countries like North Korea and Iran.
